

PITCHER SERVICES

INSTRUMENTATION INSTALLATION

Pitcher is accomplished at instrumentation installations including piezometers and inclinometers. A benefit of working with Pitcher Services is the union partnership Pitcher maintains with Operating Engineers #3.

Pitcher has worked on various seismic, geotechnical and instrumentation projects, drilling all types of ground conditions in all types of locations. Using the latest drilling equipment and technology combined with a wide range of experience spanning many years, we can lend special expertise to instrumentation and construction projects.

SERVICES

- Piezometer installations for monitoring pore water pressure and groundwater levels
- Inclinometer installations to monitor movements and stability
- Extensometers
- Groundwater monitoring wells

APPLICATIONS

Pitcher offers a full suite of instrumentation installation services for:

- bridges, dams, levees and embankments
- foundations/excavations
- groundwater monitoring
- landfills
- slope stability
- wind turbines
- pipelines and tunnels
